

CDF Operations

Greg Feild (Yale University)
All Experimenters' Meeting
December 12, 2005

Accesses (12/5 – 12/12)

- Monday - Thursday. Supervised access
 - Routine detector and building maintenance
 - L1 stereo track trigger upgrade: All fibres installed. All 9U trigger cards installed and integrated. All but one crate of COT TDC cards now upgraded.
- Sunday morning. 3 hour controlled access.
 - Repaired a loose L1 track trigger cable (consequence of access work)
- This morning. Controlled access.
 - Last minute clean up and repairs.

CDF is ready to take data when the beam comes back!

Data Reconstruction

- Sept. 5 – Nov. 9: 235 million events recorded
 - Calibrations for this data set are now ready
 - We expect data processing to take about 2 weeks
 - This data should be ready for analysis early Jan. 2006!
